# CONTENTS OF VOLUME 307

Number 1, November 15, 1993

## BIOLOGICAL OXIDATIONS AND P450 REACTIONS

The Participation of Reactive Oxygen Species and Protein Thiols in the Mechanism of Mitochondrial Inner Membrane Permeabilization by Calcium plus Prooxidants
*Valderez G. R. Valle, Marcia M. Fagian, Lucia S. Parentoni, André R. Meinicke, and Anibal E. Vercesi* 1

Thermodynamics of Reactions of Nicotinamide Adenine Dinucleotide and Nicotinamide Adenine Dinucleotide Phosphate *Robert A. Alberty* 8

Reactivity of Plasma Glutathione Peroxidase with Hydroperoxide Substrates and Glutathione
*R. S. Esworthy, F.-F. Chu, P. Geiger, A. W. Girotti, and J. H. Doroshow* 29

Expression of Rabbit Cytochromes P4504A Which Catalyze the ω-Hydroxylation of Arachidonic Acid, Fatty Acids, and Prostaglandins *Linda J. Roman, Colin N. A. Palmer, Joan E. Clark, A. Scott Muerhoff, Keith J. Griffin, Eric F. Johnson, and Bettie Sue Siler Masters* 57

## ENZYME STRUCTURE AND MECHANISMS; CELLULAR REGULATION; PHOSPHORYLATION AND DEPHOSPHORYLATION

Purification and Characterization of Amine Oxidase from Soybean Seedlings
*Fabio Vianello, Maria Luisa Di Paolo, Roberto Stevanato, Roberta Gasparini, and Adelio Rigo* 35

Regulation of Mitochondrial 3-Hydroxy-3-methylglutaryl-coenzyme A Synthase Protein by Starvation, Fat Feeding, and Diabetes
*Dolors Serra, Nuria Casals, Guillermina Asins, Teresa Royo, Carlos J. Ciudad, and Fausto G. Hegardt* 40

Amino Acid Substitutions at Position 73 in Motif 2 of *Escherichia coli* Alanyl-tRNA Synthetase
*Shelby J. Filley and Kelvin A. W. Hill* 46

Dephosphorylation on Tyrosine of Epidermal Growth Factor Receptor Is Inhibited by $Ca^{2+}$ Pretreatment in Isolated Liver Membrane *Shinsuke Katoh, Akiko Funayama, Hiroyuki Kohno, and Yasuhito Ohkubo* 52

Folate Metabolism and Deposition in Eggs by Laying Hens
*Timothy A. Sherwood, Robert L. Alphin, William W. Saylor, and Harold B. White III* 66

Evaluation of Ligand Exchange as a Model of Heterogeneity within the Binuclear Core of Cytochrome c Oxidase
*Stephen M. Gullo, Jamál A. Tayh, Jianwei Li, and Gary M. Baker* 78

Physiological Substrates for Rat Alcohol Dehydrogenase Classes: Aldehydes of Lipid Peroxidation, ω-Hydroxy-fatty Acids, and Retinoids *M. Dolors Boleda, Narcís Saubi, Jaume Farrés, and Xavier Parés* 85

Kynurenine 3-Hydroxylase in Brain: Species Activity Differences and Effect of Gerbil Cerebral Ischemia
*Kuniaki Saito, Bonnie J. Quearry, Misato Saito, Thaddeus S. Nowak, Jr., Sanford P. Markey, and Melvyn P. Heyes* 104

Identification of $Ser^{143}$ as the Site of Modification in the Active Site of Histidine Ammonia-Lyase
*Dennis Hernandez, Justin G. Stroh, and Allen T. Phillips* 126

Threonine Synthase of *Escherichia coli:* Inhibition by Classical and Slow-Binding Analogues of Homoserine Phosphate *G. King Farrington, Alok Kumar, Spencer L. Shames, Joseph I. Ewaskiewicz, David E. Ash, and Frederick C. Wedler* 165

pH of Melanosomes of B 16 Murine Melanoma Is Acidic: Its Physiological Importance in the Regulation of Melanin Biosynthesis
*Vandana Bhatnagar, Srirangam Anjaiah, Neelu Puri, B. N. Arudhra Darshanam, and Abburi Ramaiah* 183

**GLYCOCONJUGATES AND OLIGOSACCHARIDES; PROTEOGLYCANS AND EXTRACELLULAR MATRICES**

Fibronectin Fragments Alter Matrix Protein Synthesis in Cartilage Tissue Cultured *in Vitro* *Dong-lin Xie, Francis Hui, and Gene A. Homandberg* 110

Alterations in the Carbohydrate Structures of an Abnormal Protein from Sera of Patients with Rheumatoid Arthritis *Tamao Endo, Osamu Oda, Naoki Yamanaka, Kenji Maeda, Makoto Yoshida, and Akira Kobata* 119

Proteoglycan Synthesis in Fetal Tendon Is Differentially Regulated by Cyclic Compression *in Vitro* *Stephen P. Evanko and Kathryn G. Vogel* 153

**LIPIDS, LIPID MEDIATORS, AND GLYCOLIPIDS**

Hemin-Induced Lipid Membrane Disorder and Increased Permeability: A Molecular Model for the Mechanism of Cell Lysis *Tais H. Schmitt, Wilson A. Frezzatti, Jr., and Shirley Schreier* 96

Overexpression, Purification, and Kinetic Characterization of a Carboxyl-Terminal-Truncated Yeast Squalene Synthetase *Philip V. LoGrasso, Daniel A. Soltis, and Brian R. Boettcher* 193

Antioxidant Activity of All-*trans*-retinol in Homogeneous Solution and in Phosphatidylcholine Liposomes *Luisa Tesoriere, Marcello Ciaccio, Antonino Bongiorno, Antonio Riccio, Anna Maria Pintaudi, and Maria A. Livrea* 217

**MEMBRANE PROTEINS AND TRANSPORT; INTRACELLULAR SIGNALS; CYTOKINES AND RECEPTORS**

Decreased Cytochrome Oxidase Activity and Changes in Phospholipids in Heart Mitochondria from Hypothyroid Rats *Giuseppe Paradies, Francesca Maria Ruggiero, Patrizia Dinoi, Giuseppe Petrosillo, and Ernesto Quagliariello* 91

Purification of Soluble Murine Interleukin 5 (IL-5) Receptor $\alpha$ Expressed in Chinese Hamster Ovary Cells and Its Action as an IL-5 Antagonist *Nobuo Tsuruoka, Kyoko Yamashiro, and Masafumi Tsujimoto* 133

Selective Induction of $\alpha$1 Isoform of $(Na^+ + K^+)$-ATPase by Insulin/Insulin-like Growth Factor-I in Cultured Rat Astrocytes *Toshio Matsuda, Yosuke Murata, Nobuko Kawamura, Masako Hayashi, Kazuko Tamada, Kazuhiro Takuma, Sadaaki Maeda, and Akemichi Baba* 175

**PLANT BIOCHEMISTRY AND MOLECULAR BIOLOGY**

Isolation and Characterization of Pectin Methylesterase from Papaya *Yin-Mei Lim and Max C. M. Chung* 15

**PROTEIN STRUCTURE AND FUNCTION; PROTEASES, PROTEIN TURNOVER, AND POST-TRANSLATIONAL PROCESSING**

Secondary Structure and Thermal Stability of Caldesmon and Its Domains *Philip Graceffa and Agnes Jancsó* 21

Biosynthesis and Degradation of Meprins, Kidney Brush Border Proteinases *Jeanne L. Hall, Erwin E. Sterchi, and Judith S. Bond* 73

Actin Stimulates Plasmin Generation by Tissue and Urokinase-Type Plasminogen Activators *Stuart E. Lind and Carolyn J. Smith* 138

Thermal Stability and Activation of Bovine Lens Multicatalytic Proteinase Complex (Proteasome) *B. J. Wagner and Joyce W. Margolis* 146

Assembly of Atlantic Cod (*Gadus morhua*) Brain Microtubules at Different Temperatures: Dependency of Microtubule-Associated Proteins Is Relative to Temperature *Margareta Wallin, Martin Billger, Torun Strömberg, and Elisabeth Strömberg* 200

Human Erythrocyte Casein Kinase II: Characterization and Phosphorylation of Membrane Cytoskeletal Proteins *Tiequan Wei and Mariano Tao* 206

ERRATUM

Volume 304, Number 2 (1993): Krishan K. Arora and Peter L. Pedersen, "Glucose Utilization by Tumor Cells: The Enzyme Hexokinase Autophosphorylates Both Its N- and C-Terminal Halves," pp. 515–518 224

## Number 2, December 1993

**RESEARCH REPORT**

Resolution and Identification of $C_4$ Phospho*enol*pyruvate-Carboxylase Protein-Kinase Polypeptides and Their Reversible Light Activation in Maize Leaves *Bin Li and Raymond Chollet* 416

**BIOLOGICAL OXIDATIONS AND P450 REACTIONS**

cDNA Cloning and Characterization of a Novel Member of Steroid-Induced Cytochrome P450 3A in Rats *Shirou Kirita and Takashi Matsubara* 253

Enzyme-Kinetic and Immunochemical Characteristics of Mouse cDNA-Expressed, Microsomal, and Purified CYP1A1 and CYP1A2 *Ilya B. Tsyrlov, Inna S. Goldfarb, and Harry V. Gelboin* 259

Protein Kinase C Is Not Involved in Ah Receptor Transformation and DNA Binding *Michael W. Schafer, Burra V. Madhukar, Hollie I. Swanson, Kathryn Tullis, and Michael S. Denison* 267

Ascorbic Acid and Collagen Synthesis: Rethinking a Role for Lipid Peroxidation *Douglas Darr, Susan Combs, and Sheldon Pinnell* 331

Vanadate-Mediated Hydroxyl Radical Generation from Superoxide Radical in the Presence of NADH: Haber–Weiss vs Fenton Mechanism *Xianglin Shi and N. S. Dalal* 336

Denitrosation of the Anti-Cancer Drug 1,3-Bis(2-chloroethyl)-1-nitrosourea Catalyzed by Microsomal Glutathione *S*-Transferase and Cytochrome P450 Monooxygenases *Georg F. Weber and David J. Waxman* 369

Expression of a Male-Specific Cytochrome P450 Isozyme (CYP2C11) in fa/fa Zucker Rats: Effect of Phenobarbital Treatment *Abhik M. Bandyopadhyay, Inder Chaudhary, Larry W. Robertson, Brian Gemzik, Andrew Parkinson, and Robert A. Blouin* 386

**BIOPHYSICAL CHEMISTRY AND X-RAY CRYSTALLOGRAPHY**

The Effect of Nonionic Detergents on the Activity and/or Stability of Rat Brain Nitric Oxide Synthase *Yumiko Komori, Kenneth T. Chiang, and Jon M. Fukuto* 311

**ENZYME STRUCTURE AND MECHANISMS; CELLULAR REGULATION; PHOSPHORYLATION AND DEPHOSPHORYLATION**

Development of Surrogate Substrates for Juvenile Hormone Esterase *Billy F. McCutchen, Tamon Uematsu, András Székács, Tien L. Huang, Takahiro Shiotsuki, Anne Lucas, and Bruce D. Hammock* 231

Monkey 3-Deoxyglucosone Reductase: Tissue Distribution and Purification of Three Multiple Forms of the Kidney Enzyme That Are Identical with Dihydrodiol Dehydrogenase, Aldehyde Reductase, and Aldose Reductase *Kumiko Sato, Ayako Inazu, Shiho Yamaguchi, Toshihiro Nakayama, Yoshihiro Deyashiki, Hideo Sawada, and Akira Hara* 286

Molecular Cloning of a Novel Isotype of $Mg^{2+}$-Dependent Protein Phosphatase $\beta$ (Type 2C$\beta$) Enriched in Brain and Heart *Takayuki Terasawa, Takayasu Kobayashi, Takashi Murakami, Motoko Ohnishi, Shunsuke Kato, Osamu Tanaka, Hisatake Kondo, Hiroaki Yamamoto, Takuji Takeuchi, and Shinri Tamura* 342

Site-Specific Mutagenesis of the Metal Binding Sites of Porcine Fructose-1,6-Bisphosphatase *Lirong Chen, Ramesh Hegde, Meng Chen, and Herbert J. Fromm* 350

Cloning Two Isoforms of Rat Cyclooxygenase: Differential Regulation of Their Expression *Lili Feng, Wenqin Sun, Yiyang Xia, Winson W. Tang, Prithiva Chanmugam, Emmanuel Soyoola, Curtis B. Wilson, and Daniel Hwang* 361

Identification, Cloning, and Expression of the Gene for Adenylate Kinase from the Thermoacidophilic Archaebacterium *Sulfolobus acidocaldarius* *Thomas Kath, Roland Schmid, and Günter Schäfer* 405

**GLYCOCONJUGATES AND OLIGOSACCHARIDES; PROTEOGLYCANS AND EXTRACELLULAR MATRICES**

Structural Study of the Sugar Chains of Porcine Factor VIII—Tissue- and Species-Specific Glycosylation of Factor VIII *Takashi Hironaka, Kiyoshi Furukawa, Pamela C. Esmon, Takashi Yokota, James E. Brown, Shuzo Sawada, Michael A. Fournel, Masanori Kato, Takeyoshi Minaga, and Akira Kobata* 316

Uronic Acid-Containing Glycosaminoglycans and Keratan Sulfate Are Present in the Tectorial Membrane of the Inner Ear: Functional Implications *Isolde Thalmann, Kenji Machiki, Anthony Calabro, Vincent C. Hascall, and Ruediger Thalmann* 391

**LIPIDS, LIPID MEDIATORS, AND GLYCOLIPIDS**

*sn*-1,2-Diacylglycerol Cholinephosphotransferase from Pig Liver: Mixed Micellar Assay and Kinetic Analysis of the Partially Pure Enzyme *Roque Bru, Eveline Blöchliger, and P. Luigi Luisi* 295

**MEMBRANE PROTEINS AND TRANSPORT; INTRACELLULAR SIGNALS; CYTOKINES AND RECEPTORS**

Endosomal Proteolysis Precedes Ricin A-Chain Toxicity in Macrophages *Maria L. Fiani, Janice S. Blum, and Philip D. Stahl* 225

Radioligand Exchange Binding Cannot Directly Determine the Dissociation Constant ($K_d$) of the Rat Ventral Prostate Nuclear Androgen Receptor: Valid $K_d$ Determinations Require Additional Uptake Binding Data *John C. Chapman, Steven M. Freeh, and Sandra D. Michael* 242

Regulation of Proliferation in JEG-3 Cells by a 500-kDa $Ca^{2+}$ Sensor and Parathyroid Hormone-Related Protein *Per Hellman, Björn Hellman, Claes Juhlin, Harald Jüppner, Jonas Rastad, Peter Ridefelt, and Göran Åkerström* 379

Structural and Biologic Properties of a Human Aspartic Acid-126 Interleukin-2 Analog *Pamela Buchli and Thomas Ciardelli* 411

**PLANT BIOCHEMISTRY AND MOLECULAR BIOLOGY**

Identification of the Major Regulatory Phosphorylation Site in Sucrose-Phosphate Synthase *Robert W. McMichael, Jr., Robert R. Klein, Michael E. Salvucci, and Steven C. Huber* 248

ATP Sulfurylase from Higher Plants: Kinetic and Structural Characterization of the Chloroplast and Cytosol Enzymes from Spinach Leaf *Franco Renosto, Hemang C. Patel, Robert L. Martin, Christopher Thomassian, Gregor Zimmerman, and Irwin H. Segel* 272

Inhibitors of the Proton–Sucrose Symport *Daniel R. Bush* 355

Irreversible Inactivation of Monoterpene Cyclases by a Mechanism-Based Inhibitor *Rodney Croteau, William R. Alonso, Alfred E. Koepp, Jae Hoon Shim, and David E. Cane* 397

**PROTEIN STRUCTURE AND FUNCTION; PROTEASES, PROTEIN TURNOVER, AND POST-TRANSLATIONAL PROCESSING**

Kallidin-Releasing Enzyme from *Bitis arietans* (Puff Adder) Venom *Toshiaki Nikai, Michiko Momose, Yoshiyuki Okumura, Akihito Ohara, Yumiko Komori, and Hisayoshi Sugihara* 304

Cumulative Subject Index for Volumes 300–307 431

Archives of
# BIOCHEMISTRY AND BIOPHYSICS

## INSTRUCTIONS TO AUTHORS[1]

**Archives of BIOCHEMISTRY AND BIOPHYSICS** is an international journal dedicated to the dissemination of fundamental knowledge in all areas of biochemistry and biophysics. **Research Reports** and **regular manuscripts** that contain new and significant information of general interest to workers in these fields are welcome. Sufficient detail must be included to enable others to repeat the work.

**Research Reports** provide a mechanism for rapid publication of short but complete manuscripts on outstanding and novel research findings. They should consist of 1000 or fewer words of text and a total of six or fewer figures and tables. The first paragraph should describe, without abbreviations, the background, rationale, principal findings, and conclusions of the study. Experimental methods should be reported in the table or figure legends, not in the text. Acknowledgments may be included in a footnote to the title. Omit the abstract and text subheadings, and keep literature citations to a reasonable minimum. The scientific quality of these reports should be of the highest caliber to facilitate rapid review. Authors should identify the manuscript as a Research Report and submit it directly to the Editorial Office of the journal (see below).

**Accelerated** status may also be given to those manuscripts that are reviewed as outstanding and that require little or no revision. At submission, authors may request accelerated publication of their manuscript. To expedite publication of such articles, authors will not receive proofs.

Manuscripts should be written in clear, concise, and grammatical English and should be submitted in quadruplicate (one original and three photocopies), including four sets of original figures or good quality glossy prints, to:

**Archives of BIOCHEMISTRY AND BIOPHYSICS**
Editorial Office, 525 B Street, Suite 1900
San Diego, California 92101-4495

Failure to receive the required number of copies of the manuscript may delay review. All copies of halftone artwork *must* be glossy prints or originals; photocopies of halftones do not show sufficient detail to be used for the review process. *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

For nucleotide sequence data authors are encouraged to submit original nucleotide or amino acid sequence data to a databank such as GenBank or EMBL. A footnote that includes the accession number should be included on the title page. It is preferable that the sequence data be deposited either prior to submission or by the time of acceptance of the manuscript. However, a footnote can be added at the proof stage if the material is deposited after acceptance. For further information please contact the editorial office or GenBank or EMBL directly.

Policy regarding publication of experiments on unanesthetized animals conforms with the standards for use of laboratory animals established by the Institute of Laboratory Animal Resources, U.S. National Academy of Sciences. Experiments in which curariform agents are used must be justified and details of the steps taken to reduce or avoid distress to the animal must be provided, particularly with regard to electrical stimulation.

Original papers only will be considered. ***Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out. It is the responsibility of the corresponding author to obtain the agreement of all the coauthors of the manuscript prior to its submission to the journal.*** Abstracts of oral or poster presentations are not considered to constitute previous publication. Presentation of material in preliminary communications normally will not preclude publication of a full paper in **Archives**, provided that the full paper contains additional information that justifies its publication and does not repeat the presentation of the same data that supported the preliminary communication. The manuscript should be accompanied by copies of all preliminary communications and of all relevant manuscripts that are in press or under editorial consideration by another journal. Authors must verify the wording of any cited personal communication with the persons who supplied the information and obtain approval for the use of their names in connection with the quoted information or for the citation of unpublished work; written evidence of such approval should accompany the manuscript. All material published in **Archives** represents the opinions of the authors and should not be construed to reflect the opinions of the Editors or the Publisher.

Authors should suggest competent reviewers in their field and may also suggest individuals whom they wish to have excluded from the review process. The corresponding author will receive a decision letter from the Executive Editor. Revised manuscripts and correspondence concerning such manuscripts should be sent to the Executive Editor at the address indicated on the decision letter. Revised manuscripts should be accompanied by a copy of the unrevised version.

Many acceptable papers require minor revision or condensation. It is in the mutual interest of both the authors and the journal that amended manuscripts be returned promptly. A revised paper will retain its original date of receipt only if it is received by the Executive Editor within 2 months of the date of return to the author.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

[1] An extended Instructions to Authors is published in the January issue of **Archives of BIOCHEMISTRY AND BIOPHYSICS**. Reprints are available from the Editorial Office upon request. Authors should consult the extended Instructions for details on nomenclature, IUPAC–IUBMB rules and recommendations, and accepted abbreviations.

**Form of manuscript**. Manuscripts should be typewritten and double-spaced throughout on one side of $8\frac{1}{2} \times 11$-in. white paper, with 1-in. margins on all sides. All pages should be numbered consecutively.

*Subject Areas.* Authors should specify on page 1 of the manuscript the Subject Area of the article submitted:

Biological Oxidations and P450 Reactions
Glycoconjugates and Oligosaccharides; Proteoglycans and Extracellular Matrices
Lipids, Lipid Mediators, and Glycolipids
Biophysical Chemistry and X-Ray Crystallography
Membrane Proteins and Transport; Intracellular Signals; Cytokines and Receptors
Enzyme Structure and Mechanisms; Cellular Regulation; Phosphorylation and Dephosphorylation
Plant Biochemistry and Molecular Biology
Protein Structure and Function; Proteases, Protein Turnover, and Post-translational Processing
Gene Expression, Transcription, and Translation

*Page 1* should contain the article title, author(s), affiliation(s), a short running title (abbreviated form of title) of less than 65 characters including letters and spaces, the appropriate subject category for listing in the Table of Contents, suggestions for index list entries, and the name, complete mailing address, and telephone and fax numbers of the person to whom correspondence should be sent.

*Page 2* should contain a short abstract of 50–250 words.

Editorial style should conform to the *Handbook for Authors* (American Chemical Society).

**Footnotes** to the text should be identified by superscript Arabic numerals and should be typed double-spaced on a separate sheet: footnotes to tables should be identified by superscript lowercase italic letters ($^{a,b}$, etc.) and placed at the bottom of the table.

**Tables** should be numbered with Roman numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. Units must be clearly indicated for each of the entries in the table.

Authors can submit complex tables and mathematical material as camera-ready copy. In this way, they are spared multiple, tedious proofreadings and the chance of error is reduced. Tables submitted as camera-ready copy should be typed single-spaced whenever possible and preferably submitted as $5 \times 7$-in. glossy prints.

**Figures** should be cited consecutively in the text by Arabic numerals. Legends should be typed double-spaced on a separate sheet. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. They should be planned to fit the proportion of the printed page ($7\frac{1}{8} \times 9$ in.; column width, $3\frac{1}{2}$ in.) and submitted no larger than $8\frac{1}{2} \times 11$ in. Lettering on drawings should be of professional quality or generated by *high-resolution* computer graphics and should be large enough (10–12 points) to take a reduction of 50–60%. Drawings should be made with black India ink on tracing linen, smooth-surface white paper, or Bristol board. Alternatively, *high-quality* computer graphics may be acceptable. Graph paper, if used, should be ruled in blue. Glossy prints of figures properly prepared are acceptable. Illustrations in color can be accepted only if the authors defray the cost.

**Cover photographs.** Suggestions for *cover photographs* are welcome. Submit them as slides with $8\frac{1}{2} \times 11$-in. color or black-and-white prints to accompany specific articles. A short (one-line) legend should accompany each photograph.

**References** should be cited in the text by an Arabic numeral in parentheses and listed at the end of the paper in numerical order typed double-spaced on a separate sheet. Abbreviations of journal titles should conform to those of the most recent edition of *Chemical Abstracts Service Source Index.* Please note the following examples.

1. Gemzik, B., Green, J., and Parkinson, A. (1992) *Arch. Biochem. Biophys.* **296,** 355–365.
2. Stein, W. D. (1986) Transport and Diffusion across Cell Membranes, Academic Press, San Diego.
3. Compton, T. (1990) *in* PCR Protocols: A Guide to Methods and Applications (Innis, M. A., Galfand, D. H., Sninsky, J. J., and White, T. J., Eds.), pp. 39–45, Academic Press, San Diego.

**Miniprint supplements** are an effective way of presenting supportive data. They are printed from plates made by photographic reduction from typed pages provided by the author. Types of data that have been published as miniprint supplements include analyses relevant to studies of amino acid or polynucleotide sequences, details of chemical syntheses, preparation of enzymes, extended statistical or mathematical discussions, and X-ray diffraction data. The miniprint supplement is published in the journal, immediately following the parent paper, and is included in the reprints. Since the miniprint supplement is produced from camera-ready copy supplied by the authors with no redaction or editorial changes it is important that the copy be letter perfect and conform to the style of the journal. *Authors will not be permitted to make changes to the miniprint supplement at the proof stage. Any changes necessary in the proof must be made as a typeset "Note added in proof."*

**Proofs** will be sent to the author, with a reprint order form. Authors will be charged for extensive alterations.

**Reprints**. Fifty reprints of each article will be provided free of charge. Additional reprints may be purchased.

**Personal computer disks.** Manuscripts may be submitted to **Archives of BIOCHEMISTRY AND BIOPHYSICS** on personal computer disks after the manuscript has been accepted and after all revisions have been incorporated onto the disk. Label the disk with the type of computer used, the type of software and the version number, and the disk format. All tabular material will be typeset conventionally. Art must be prepared as camera-ready copy; see the section on Figures earlier in these Instructions to Authors.

A hard copy printout of the manuscript that exactly matches the disk file must be supplied. Academic Press will not accept disks without accompanying printouts of all files on the disk. File names must clearly indicate the content of each file. The manuscript will be edited according to the style of the journal, and the proofs must be read carefully by the author. Disks that are not translatable or economical to process will not be used. The publisher reserves the right not to use the disk.

For further information on preparing the disk for typesetting conversion, please contact the publisher (Editorial Supervisor, Journal Division, Academic Press, 525 B Street, Suite 1900, San Diego, California 92101-4495; telephone: (619) 699-6415; fax: (619) 699-6800).
